

Cost of HORIZONS data access

We are committed to maximising the utility and value of the HORIZONS datasets and supporting others to access the data. Datasets are available on request subject to meeting the requirements of the data access policy.

In most cases we apply a charge for this service as we no longer have core funding for HORIZONS. Funds requested cover team time to review proposals, maintain the datasets, set up data sharing agreements, prepare datasets for individual projects and respond to queries. The level of costing applied depends on the scale of the work involved to fulfil the request and the intended purpose. After a project proposal has been agreed in principle an accurate costing will be generated. Additional requests or amendments to agreed requests will likely incur a charge.
