

Results summary from 2024 – thanks again for taking part!

Part 1

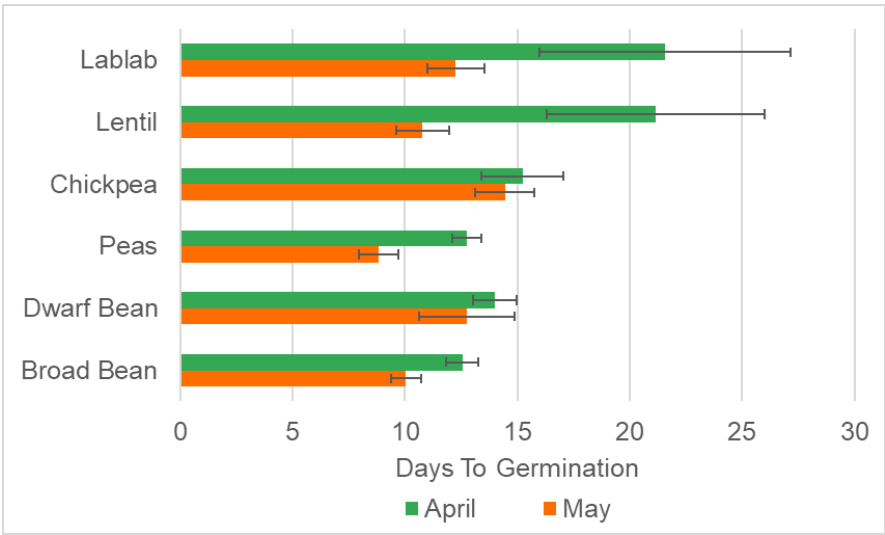

1a. How long did it take for the different beans to germinate and flower?

1b. Where are these beans native to? Does this help explain the results?

Part 2

Do beans that are sown in April or May germinate faster? Why do you think this might be?

Part 3

3a. Do beans that are sown in different parts of the UK germinate or flower at different times? Why do you think this might be?

3b. There were no flowering lablabs or chickpeas in the North – can you think why this is? Hint – where are these beans native to?
